

A background image showing a business meeting. A man in a dark suit and tie is on the left, holding a white coffee cup. A woman in a dark blazer is on the right, holding a smartphone. In the foreground, there is a tablet displaying a document with text and a circular graphic. The overall scene is professional and collaborative.

Real Estate Advisory Using Predictive Modeling

Prepared by: Sahitya Gantala

Date: April 2025

Strategic Thinking: Why These Three Areas?

Strategic Thinking: Why These Three Areas?

Client Application: Framework Flexibility

Models can be retrained with new neighborhood or client data.

Swapping datasets (CSV/API) updates predictions instantly.

Permits, zoning, vacancies → predict appreciation & timing.

Summary: Zero-cost engine adaptable to client-specific needs.

Model Logic: Detecting Growth Early

- (NUMBER OF SALES) and pricing metrics (AVERAGE, MEDIAN, MAXIMUM SALE PRICE) — without needing complicated or hidden variables
- Building permits $\uparrow$ + Zoning loosened + Vacancies $\uparrow$ = Targeted Opportunity.
- Flags areas ready for repositioning (retail $\rightarrow$ residential).
- Empowers early investment before price surges.
- Summary: Read early signals, act smarter, maximize returns.

Business Framing: Helping Clients and Investors

Forecasts remove guesswork
around valuations.

Liquidity targeting optimizes
investment sites.

Speeds decision cycles through
predictive confidence.

Summary: De-risk, Allocate
Smarter, Move Quicker.

Tech Simplicity: Zero Cost, Fast Execution

Equipment: Laptop only. Tools: Python, Excel.

Infrastructure: Open-source, local, portable.

Cost: \$0 - No cloud servers or external dependency.

Summary: Affordable, fast, replicable analytics platform.

Next Steps: Future Development

- Live Dashboards for real-time monitoring.
- Integrate zoning API for predictive repositioning alerts.
- Expand to rental yield and Opportunity Zones.
- Summary: Evolving to a full decision intelligence platform.

Thank you
